Come alive this winter...

Sierra

Vogue
HOME HEATING

Sierra

The Sierra is the perfect fit in any small home. Its focus is on warmth and intimacy - a cosy companion anywhere from the living room, study or parents retreat.

The Benefits:

- Rugged steel construction
- Large viewing glass
- Low emissions
- Environmentally friendly
- Ease of installation in new and existing homes
- Simplicity and safety in design (full convection)
- Touch safe

Specifications

Heat Rating	12-15 sqs.
Width	570 mm
Depth	480 mm
Height	700 mm
Weight	100 kg

Made in Brisbane by the Australian Design Award winning Vogue Home Team.

In this modern age of excess and pollution, it is satisfying to know that not every fuel source is poisoning the atmosphere.

Burning wood efficiently is still the most energy efficient, cost effective and clean method of heating your home.

- Wood is the only Renewable Energy Source.
- Burning wood releases no more Carbon Dioxide into the atmosphere than it would rotting on the forest floor.
- Burning wood is natural, clean and reduces our reliance on the dirty coal powered alternatives.

Measurements

A	125 mm
B	325 mm
C	350 mm
D	610 mm
E	125 mm
F	225 mm

*** Environmentally Friendly**
