

VISTA SERIES

WOOD BURNING STOVES
FOR HEATING SMALL TO MEDIUM SPACES

VISTA

FREESTANDING STOVE

FOR SMALL – MEDIUM SPACES

Pacific Energy Vista Series Wood Stoves are customizable in your choice of door and leg finishes. Available in Nickel and Black.

Black

Nickel

Peak Heat Output

16 kW

COMBINED EFFICIENCY	67%
EMISSIONS	1.5 GM/KG
LOG SIZE (MAX)	40–45 CM
FIREBOX SIZE	41 L
GLASS SIZE	66 CM ²
WEIGHT	125 KG

The Vista Series woodstove makes an excellent choice for heating spaces small to medium spaces. Despite its compact size, this is a high-performance woodstove, engineered for powerful heat output, high efficiency and ease of use, and Pacific Energy's floating firebox of heavy-gauge steel.

BAFFLE SYSTEM

Pacific Energy is a recognized industry leader in “clean burn” technology, as exemplified in our unique high capacity baffle system for preheating secondary combustion air for re-burning. By burning the combustible elements in the air, we improve our stoves’ environmental performance while significantly reducing the amount of wood that is consumed.

FLOATING FIREBOX

Our floating firebox system is legendary in the industry. Solidly designed with steel brick-support rails, it allows key parts to freely expand and contract, which reduces metal fatigue and adds years of life to the entire fireplace. The steel baffle (part of the clean-burning secondary combustion system) and the flame shield (which protects the stove top from intense heat) are all part of the floating firebox system.

KNIFE EDGE DOOR

A formed and welded knife edge opening creates a superior air tight seal to the door gasket while strengthening the stove face. This is a more labor intensive design but our experience has proven this is the best way to manufacture a fireplace.

SINGLE LEVER AIR CONTROL

It's never been simpler to achieve a clean, efficient flame. With Pacific Energy systems, a single, easy-to-operate air control lever can regulate the entire burn.

FEATURES

- Reliable, durable Non-Catalytic Technology
- Multi-port Combustion Air Injection System
- Easy one-touch operation
- Airwash Technology for clear, clean glass
- Inside and outside combustion air capable
- Heavy plate steel top
- East-West loading

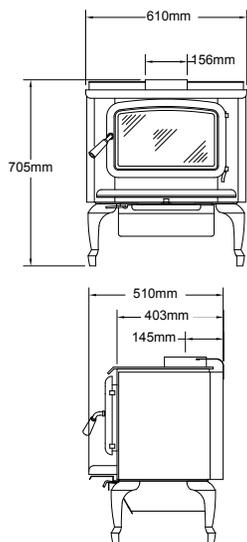

PERFORMANCE OPTIONS

- 135 m³/hr Fan
- Easy-to-use ash disposal system

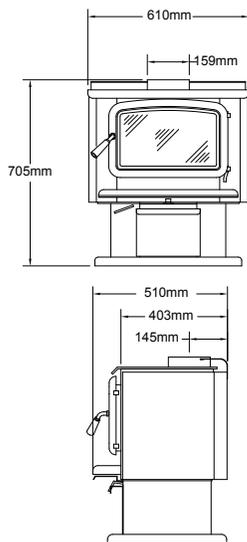

DESIGN OPTIONS

- Legs - choice of 2 finishes (nickel and black)
- Pedestal base
- Arched door - choice of 2 finishes (nickel and black)
